

RPM International, Inc.

Region	North America
Country/Area	United States of America
Questionnaire	Chemicals
Activity Group	Chemicals

The CDP Score Report allows companies to understand their score and indicate which categories require attention to reach higher scoring levels. This enables companies to progress towards environmental stewardship through benchmarking and comparison with peers, in order to continuously improve their climate governance. Investors will additionally receive a copy of the CDP Score Report upon request. For further feedback please contact your account manager or your key CDP contact.

Your CDP score

Average performance

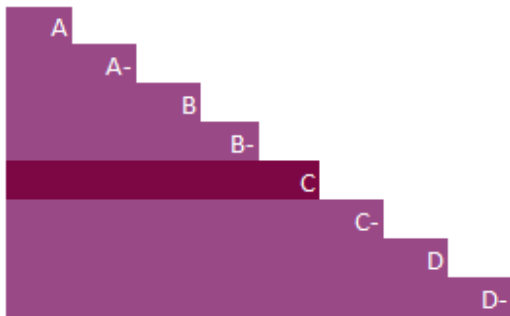

Chemicals

North America

Global Average

UNDERSTANDING YOUR SCORE REPORT

RPM International, Inc. received a C which is in the Awareness band. This is the same as the North America regional average of C, and lower than the Chemicals sector average of B-.

Leadership (A/A-): Implementing current best practices

Management (B/B-): Taking coordinated action on climate issues

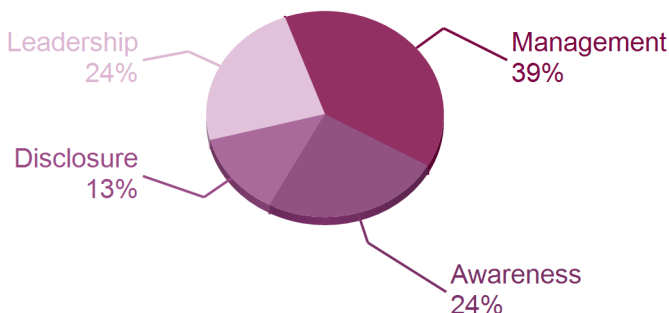

Awareness (C/C-): Knowledge of impacts on, and of, climate issues

Disclosure (D/D-): Transparent about climate issues

ACTIVITY GROUP PERFORMANCE

Chemicals

Your company is amongst 24% of companies that reached Awareness level in your Activity Group.

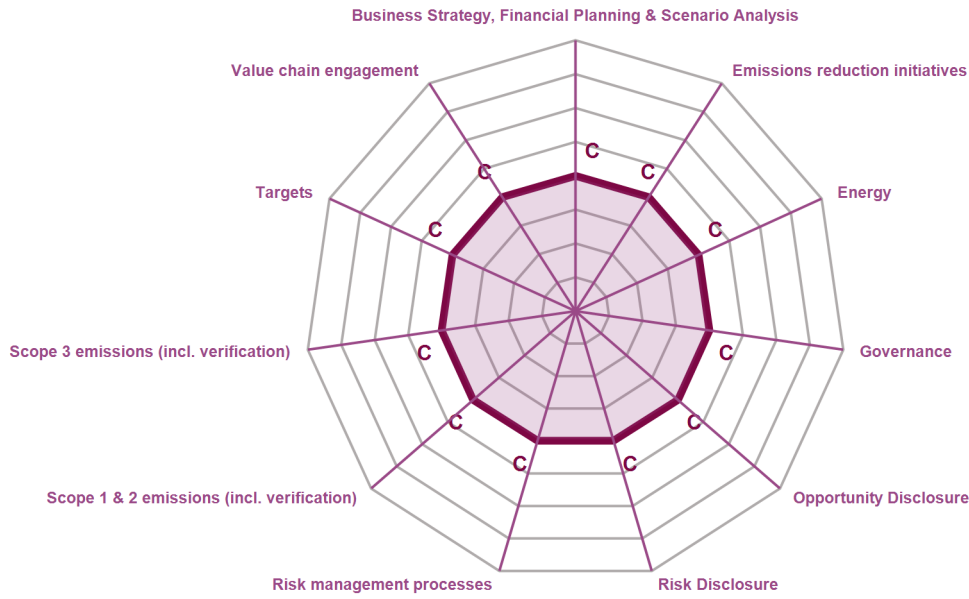

A sample of A-list companies from your Activity Group:

- AmorePacific Corporation
- Beiersdorf AG
- Borregaard ASA
- Colgate Palmolive Company
- FIRMENICH SA

*Please note that the peer group average scores are compiled with only investor-requested company scores

CATEGORY SCORES

If a company scored C or below, they will not have been scored for Management or Leadership points (the dark purple line represents this).

Please download the [CDP Scoring Introduction](#) for more information.

CATEGORY SCORES BENCHMARKING

Each category score in the bar chart represents the progression within each scoring level. Some categories have not been included for category score breakdown as either not enough questions feed into these categories to give a representative score or they are not scored at both Management and Leadership levels.

Scoring categories are groupings of questions by topic. They are sub-groups of the 2022 questionnaire modules and are consistent across all sectors. Weighting applied to each category varies across sectors to highlight the areas most important to environmental stewardship in specific sectors.

To find out more about category weightings for each sector, please download the [‘CDP Scoring Categories and Weighting’](#) documents.

Welcome to your CDP Climate Change Questionnaire 2022

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

RPM International Inc. owns subsidiaries that are world leaders in specialty coatings, sealants, building materials and related services. The Company operates across four reportable segments: consumer, construction products, performance coatings and specialty products. RPM has a diverse portfolio with hundreds of market-leading brands, including Rust-Oleum, DAP, Zinsser, Varathane, Day-Glo, Legend Brands, Stonhard, Carboline, Tremco and Dryvit. From homes and workplaces, to infrastructure and precious landmarks, RPM's brands are trusted by consumers and professionals alike to help build a better world. The Company employs approximately 15,500 individuals worldwide. In FY2021, RPM International Inc. revenue was approximately \$6.1 billion. Please see more at www.rpminc.com/

C0.2

(C0.2) State the start and end date of the year for which you are reporting data.

	Start date	End date	Indicate if you are providing emissions data for past reporting years
Reporting year	January 1, 2021	December 31, 2021	No

C0.3

(C0.3) Select the countries/areas in which you operate.

- Argentina
- Australia
- Belgium
- Brazil
- Canada
- Chile
- China
- Colombia
- Costa Rica

France
Germany
Guatemala
India
Italy
Malaysia
Mexico
Netherlands
New Zealand

Poland
Republic of Korea
South Africa
Spain
Sweden
Turkey
United Arab Emirates
United Kingdom of Great Britain and Northern Ireland
United States of America

C0.4

(C0.4) Select the currency used for all financial information disclosed throughout your response.

USD

C0.5

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your chosen approach for consolidating your GHG inventory.

Operational control

C-CH0.7

(C-CH0.7) Which part of the chemicals value chain does your organization operate in?

Row 1

Bulk organic chemicals

Bulk inorganic chemicals

Other chemicals

Specialty chemicals

Specialty organic chemicals

C0.8

(C0.8) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?

Indicate whether you are able to provide a unique identifier for your organization	Provide your unique identifier
No	

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

Yes

C1.1a

(C1.1a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for climate-related issues.

Position of individual(s)	Please explain
Board-level committee	<p>Each RPM Director on the Corporate Governance and Nominating Committee (the “Committee”) of our Board of Directors (the “Board”) has responsibility for oversight of RPM’s sustainability strategy, efforts to identify sustainability risks and opportunities (including climate-related issues), and the development and implementation of goals the Company may establish from time to time relating to the same. As such, the Committee has responsibility for climate-related issues.</p> <p>As part of its duties, in 2020, the Committee supported the climate-related decision to create the Environmental, Social and Governance Oversight Committee (the “ESG Committee”). In 2021, the Committee changed the name to Building a Better World Oversight Committee (the “BABW Committee”) to support RPM’s ongoing commitment to responsibly serve and engage our associates, customers and stakeholders on critical sustainability matters. We also amended our Governance and Nominating Committee Charter to assign climate and sustainability performance as a responsibility of the Governance and Nominating Committee, given it has oversight over sustainability strategy across the company. We continue to build Board engagement in environmental and social issues with the help of added sustainability experience from new Directors. Each of these examples constitute a climate-related decision made within the last two years.</p>

C1.1b

(C1.1b) Provide further details on the board’s oversight of climate-related issues.

Frequency with which climate-related issues are a scheduled agenda item	Governance mechanisms into which climate-related issues are integrated	Please explain
Scheduled – all meetings	<p>Reviewing and guiding strategy</p> <p>Reviewing and guiding major plans of action</p> <p>Reviewing and guiding risk management policies</p> <p>Monitoring implementation and performance of objectives</p> <p>Monitoring and overseeing progress against goals and targets for addressing climate-related issues</p>	<p>In 2021, we amended our Governance and Nominating Committee Charter to assign sustainability performance as a responsibility of the Governance and Nominating Committee, given it has oversight over sustainability strategy across the company. We continue to build Board engagement in environmental and social issues, with the help of added sustainability experience from new Directors.</p> <p>The Corporate Governance and Nominating Committee (the “Committee”) of our Board of Directors (the “Board”) has responsibility for oversight of RPM’s efforts to identify sustainability risks and opportunities (including climate-related issues), and the development and implementation of strategy and major plans of action the Company may establish from time to time relating to the same, some of which have been delegated to the Building a Better World Oversight Committee (“BABW Committee”). The BABW Committee supports our ongoing commitment to responsibly serve and engage our associates, customers and stakeholders on critical sustainability matters. The BABW Committee reports to the Governance and Nominating Committee of the Board of Directors and oversees the identification of sustainability and climate-related risks and opportunities and leads the processes for developing and managing appropriate goals. This work is incorporated into the agenda at every meeting. The Chair of the BABW Committee reports regularly to the Governance and Nominating Committee of the Board to provide timely line of sight into important sustainability and climate-related issues.</p>

C1.1d

(C1.1d) Does your organization have at least one board member with competence on climate-related issues?

	Board member(s) have competence on climate-related issues	Criteria used to assess competence of board member(s) on climate-related issues
Row 1	Yes	<p>The Board of Directors believes that all the Company’s Directors are highly qualified and have specific employment and leadership experiences, qualifications, and skills that qualify them for service on the Board of Directors. The specific experiences, qualifications and skills that the Board of Directors considered in determining that each such person should serve as a Director are included in their individual biographies and also summarized in our Proxy Statement.</p> <p>Upon analyzing our Directors for qualifications, we found that each of our Directors has at least some specific employment and leadership experiences, qualifications, and skills that have given them knowledge of and experience with sustainability and ESG initiatives.</p> <p>Specific examples of criteria used to assess competence include:</p> <ul style="list-style-type: none"> • A Director who is the Chief Sustainability & Strategy Officer, Caterpillar Inc. • A Director who is the Executive Vice President – Sustainability & Strategy, Union Pacific Corporation

C1.2

(C1.2) Provide the highest management-level position(s) or committee(s) with responsibility for climate-related issues.

Name of the position(s) and/or committee(s)	Responsibility	Frequency of reporting to the board on climate-related issues
Sustainability committee	Both assessing and managing climate-related risks and opportunities	Quarterly

C1.2a

(C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored (do not include the names of individuals).

We center-lead sustainability from the top with our Board of Directors and our cross-functional Building a Better World Oversight Committee, established in 2021, representing both corporate and operations management, allowing us to focus our sustainability efforts in ways that align with our business practices.

The Better World Oversight Committee (the “BABW Committee”) supports our ongoing commitment to responsibly serve and engage our associates, customers and stakeholders on critical sustainability matters. The BABW Committee reports to the Governance and Nominating Committee of the Board of Directors. Members of the Committee include the Vice President of Corporate Benefits & Risk Management; Senior Vice President, General Counsel and Chief Compliance Officer; Vice President – Environmental, Health and Safety; Vice President of Operations (RPM’s COO-equivalent); and the Director of Sustainability. The BABW Committee is chaired by the Vice President – Compliance, Associate General Counsel and Assistant Secretary.

The BABW Committee oversees the identification of sustainability and climate-related risks and leads the processes for developing and managing appropriate goals. This work is incorporated into the agenda at every meeting. The Chair of the BABW Committee reports periodically to the Governance and Nominating Committee of the Board to provide a timely line of sight into important sustainability and climate-related issues. Within the BABW Committee, there are dedicated subcommittees of subject matter experts that focus on addressing and managing risks, opportunities and strategies as well as developing initiatives and programming regarding each of our pillars in the Building a Better World framework: Our Products, Our People and Our Processes.

C1.3

(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?

	Provide incentives for the management of climate-related issues	Comment
Row 1	Yes	The 168 Awards are designed to annually recognize excellence within RPM across many categories, such as innovation, engineering, efficiency, sustainability and more. They are named for the number of hours in a week and remind us all to use our limited amount of time wisely and productively. The awards are presented in various categories and spotlight new products, acquisitions, teamwork, sustainability, and operational excellence. In recognition for their valuable contributions, award winners each receive recognition at an awards ceremony.

C1.3a

(C1.3a) Provide further details on the incentives provided for the management of climate-related issues (do not include the names of individuals).

Entitled to incentive	Type of incentive	Activity incentivized	Comment
All employees	Non-monetary reward	Other (please specify) Miscellaneous climate-related sustainability activities	<p>We designed the 168 Connections Creating Value and Innovations Awards to annually recognize excellence within RPM across many categories, such as innovation, engineering, efficiency, sustainability and more. The number 168 represents the number of hours in a week and reminds us to use our limited amount of time wisely and productively. The awards spotlight great new products, acquisitions, teamwork, sustainability and operational excellence. Award winners receive recognition at an awards ceremony in honor of their valuable contributions.</p> <p>In 2021, we introduced two new Building a Better World-specific accolades to our Awards Program to empower and encourage our employees to participate in our Building a Better World journey.</p> <ul style="list-style-type: none"> • Building a Better World – Environmental Impact Award • Building a Better World – Social Responsibility Award <p>For 2022, we will add add a Building a Better World Product Sustainability Award, which will be granted to an RPM employee or team that has developed an eco-conscious product or enhanced the sustainability profile of an existing product.</p>

C2. Risks and opportunities

C2.1

(C2.1) Does your organization have a process for identifying, assessing, and responding to climate-related risks and opportunities?

No

C2.1a

(C2.1a) How does your organization define short-, medium- and long-term time horizons?

	From (years)	To (years)	Comment
Short-term	1	3	
Medium-term	3	5	
Long-term	5	10	

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

RPM utilizes SEC guidance on materiality when defining substantive financial and strategic impacts on our business. The RPM enterprise risk management process includes the identification, assessment, mitigation, and monitoring of risks. The process considers a variety of qualitative and quantitative factors, which may include climate-related factors, such as catastrophic events. Risks are mapped on the basis of both impact and likelihood.

C2.2g

(C2.2g) Why does your organization not have a process in place for identifying, assessing, and responding to climate-related risks and opportunities, and do you plan to introduce such a process in the future?

	Primary reason	Please explain
Row 1	Important but not an immediate business priority	<p>During fiscal 2020, RPM conducted a robust ESG materiality assessment of our operations. Based on these results, we introduced the RPM ESG Oversight Committee, which has responsibility for determining which ESG risks and opportunities, including climate-related issues. The Building a Better World (BABW) Oversight Committee, established in 2021, oversees the identification of sustainability and climate-related risks.</p> <p>We introduced our corporate enterprise risk assessment process 10 years ago. In 2021, RPM implemented plans to consolidate our separate risk assessment processes into one Enterprise Risk Assessment. To identify risks, we survey management teams across our business units. We synthesize our enterprise level risk assessment to cover a range of topics including internal audit, finance, compliance and, most recently sustainability and climate change. We use a series of questionnaires and follow-up meetings to focus on the specific risk areas identified through the assessment. We publish key findings internally and address gaps. We report the results of the risk assessment to the Board of Directors annually.</p> <p>In 2022, we will manage the Risk Assessment through a series of online questionnaires and follow up meetings. We will publish key findings internally and address identified gaps. We intend for this new assessment process to be completed annually to identify, analyze, evaluate and mitigate compliance and climate change risk.</p>

C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

Yes

C2.3a

(C2.3a) Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.

Identifier

Risk 1

Where in the value chain does the risk driver occur?

Direct operations

Risk type & Primary climate-related risk driver

Emerging regulation

Mandates on and regulation of existing products and services

Primary potential financial impact

Increased direct costs

Company-specific description

Compliance with environmental, health and safety laws (EHS) and regulations could subject us to unforeseen future expenditures or liabilities, which could have a material adverse effect on our business. We are subject to numerous, complicated and often increasingly stringent EHS laws and regulations in the jurisdictions where we conduct business. Governmental and regulatory authorities are continually reviewing and imposing various new laws and regulations that relate to environmental protection, the use, sale and export of certain chemicals or hazardous materials, and various health and safety matters.

These laws and regulations include the Clean Air Act, the Clean Water Act, RCRA, CERCLA, TSCA, REACH and various other federal, state, provincial, local and international statutes. These laws and regulations may impose strict, retroactive and joint and several liability for the costs of, and damages resulting from, cleaning up our or our predecessors' past or present facilities and third-party disposal sites. We could be subject to future liability as a result of emerging laws and regulations.

Situation: Increasingly more stringent EHS laws and regulations, including climate-related mandates and disclosures may lead to increased costs in our direct operations associated with our production practices.

Task: We continually explore emissions reductions activities across our operations to optimize our facilities and production practices and to minimize our environmental footprint and associated regulatory risk profile.

Action: We are modernizing our facilities by implementing energy efficiency measures,

moving to a cleaner energy profile, sourcing lower impact materials and improving logistics across our portfolio. We also started a Renewable Energy Opportunity Assessment with outside consultants that will be completed in 2022.

Result: Operational improvements have resulted in reduced GHG emissions and more responsible elimination of waste. Viapol for example, part of RPM's Construction Products Group, meets 78% of its energy needs for process heat by using biomass instead of natural gas. This Brazilian facility installed a wood chip burner system that uses locally sourced by-products from manufacturing pallets and boxes. We are actively developing products that meet or exceed rapidly changing regulatory requirements through our green chemistry initiatives.

Development and/or expansion of low emission goods and services

Primary potential financial impact

Increased revenues resulting from increased demand for products and services

Company-specific description

Sustainability has always been a vital part of our product innovation process at RPM. Over decades, our operating companies have led their industries with novel solutions that renew, repair and protect materials. By extending the lifetime of materials, buildings and infrastructure, our products create opportunities for our customers and end-users to reduce their energy use and greenhouse gas emissions. RPM strives to promote our products for use in restoration/maintenance of existing building materials to meet rising customer demand for more sustainable building projects. For example, Tremco roofing systems are designed to reduce cost and energy use in buildings. Tremco's AlphaGuard® fluid-applied roofing system uses a roof coating product that can extend the life of some roofs potentially indefinitely. By eliminating the need to tear off entire roofing systems due to age or damage, AlphaGuard cuts down on energy consumption and landfill waste. Because most fluid-applied roofs are white, which reflects sunlight, they reduce the heat island effect and enhance the ability of buildings to regulate temperature more efficiently, leading to more efficient energy usage and a reduction in GHG emissions. Tremco also offers vegetated, cool and photovoltaic roofing systems for sustainable construction. As market conditions evolve due to climate-related consumers preferences and demand for low emission goods and services increases, we believe we have significant advantage to increase sales of these low emission goods and services.

C3. Business Strategy

C3.1

(C3.1) Does your organization’s strategy include a transition plan that aligns with a 1.5°C world?

Row 1

Transition plan

No, our strategy has been influenced by climate-related risks and opportunities, but we do not plan to develop a transition plan within two years

Explain why your organization does not have a transition plan that aligns with a 1.5°C world and any plans to develop one in the future

Historically, RPM’s subsidiaries employed an entrepreneurial operating philosophy, with each responsible for managing environmental, social, and governance (ESG) in an autonomous manner that best benefits each business. Our overall business strategy includes five strategies that are key to RPM’s continued growth and success:

1. Strategic Acquisitions: In keeping with its reputation of being “the best home for entrepreneurial companies” in the industry, RPM conducts a strategic acquisition

program that creates shareholder value by attracting successful entrepreneurial companies and product lines, while applying a disciplined approach to investing in their continued growth.

2. Product Innovations: A major driving force behind its growth, RPM pioneers cutting-edge product innovations that are designed to penetrate new markets, drive incremental sales growth and solve problems for its customers.

3. Connections Creating Value: RPM promotes a culture of collaboration among its operating companies—a strategy that has resulted in increased market penetration, improved efficiencies in manufacturing and distribution, and shared technological resources.

4. Geographic Expansion: RPM continues to expand its global footprint through strategic acquisitions, joint ventures and partnerships between operating units companies. These initiatives have led to increased sales and market share gains.

5. Operational Excellence: RPM drives continuous improvement and operational excellence across its business segments—a long-term strategy that positions the company for sustained growth and profitability.

We feel this organization and associated strategy allows us to manage our ESG topics and precludes us from the need to have a formal transition plan at this time.

C3.2

(C3.2) Does your organization use climate-related scenario analysis to inform its strategy?

	Use of climate-related scenario analysis to inform strategy	Primary reason why your organization does not use climate-related scenario analysis to inform its strategy	Explain why your organization does not use climate-related scenario analysis to inform its strategy and any plans to use it in the future
Row 1	No, and we do not anticipate doing so in the next two years	Judged to be unimportant, explanation provided	As an offshoot of RPM's MAP to Growth operating improvement initiative, and the centralization of certain manufacturing, procurement, and general administrative functions, RPM is now taking a more holistic view of its ESG practices to create a sustainability strategy integrated into our business strategy. We are motivated to do so in part because of RPM's long history of corporate responsibility, as well as increased stakeholder interest in and desire for greater ESG disclosure. Because we take a holistic view of ESG practices, we have not felt the need to use climate-related scenario analysis to inform our business strategy.

C3.3

(C3.3) Describe where and how climate-related risks and opportunities have influenced your strategy.

	Have climate-related risks and opportunities influenced your strategy in this area?	Description of influence
Products and services	Evaluation in progress	RPM is currently evaluating how it plans to adjust its business strategy concerning products and services as we begin strategize ways to mitigate our climate-related risks and opportunities.
Supply chain and/or value chain	Evaluation in progress	RPM is currently evaluating how it plans to adjust its business strategy concerning supply chain and/or value chain as we begin strategize ways to mitigate our climate-related risks and opportunities.
Investment in R&D	Evaluation in progress	RPM is currently evaluating how it plans to adjust its business strategy concerning investment in R&D as we begin strategize ways to mitigate our climate-related risks and opportunities.
Operations	Evaluation in progress	RPM is currently evaluating how it plans to adjust its business strategy concerning operations as we begin strategize ways to mitigate our climate-related risks and opportunities.

C3.4

(C3.4) Describe where and how climate-related risks and opportunities have influenced your financial planning.

	Financial planning elements that have been influenced	Description of influence
Row 1	Revenues	RPM intends to analyze the potential impacts to revenue of its most significant climate-related risks and opportunities over time.

C4. Targets and performance

C4.1

(C4.1) Did you have an emissions target that was active in the reporting year?

No target

C4.1c

(C4.1c) Explain why you did not have an emissions target, and forecast how your emissions will change over the next five years.

	Primary reason	Five-year forecast	Please explain
Row 1	We are planning to introduce a target in the next two years	We plan to reduce our Scope 1 and 2 emissions at our facilities as part of our commitment to reduce the impact of our operations on the planet, by the end of calendar year 2025.	During fiscal 2020, RPM conducted a robust ESG materiality assessment of our operations. This assessment identified our most significant ESG issues for our business. While energy and emissions were identified as important during this ESG assessment, developing a group-level goal toward managing these topics was not seen as an immediate priority. Currently, each of our businesses, along with our MAP to Growth initiative, support continuous improvement in energy spend and efficiency, and associated emissions reductions. One focus of this culture of continuous improvement is on identifying energy- and emissions-saving opportunities in our facilities and the pursuit of new products and potential acquisitions that enable expansion of our sustainable product lines. Focusing our efforts on the success of the MAP to Growth initiative allows every operating company and every employee to remain focused on optimizing the business, including our environmental footprint.

C4.2

(C4.2) Did you have any other climate-related targets that were active in the reporting year?

No other climate-related targets

C4.3

(C4.3) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.

Yes

C4.3a

(C4.3a) Identify the total number of initiatives at each stage of development, and for those in the implementation stages, the estimated CO2e savings.

	Number of initiatives	Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)
Under investigation	1	0
To be implemented*	7	0
Implementation commenced*	6	0
Implemented*	1	24

Comment

In 2021, RPM completed an energy savings project at the Fibrecrete Plant/MRT Distribution Center in Mount Airy, NC and the Applied Polymerics HQ facility. This project was completed in cooperation with Duke Energy.

C4.3c

(C4.3c) What methods do you use to drive investment in emissions reduction activities?

Method	Comment
Compliance with regulatory requirements/standards	RPM employs an Environmental Management System (EMS) which includes a comprehensive, systematic, and planned structure for developing and implementing environmental programs across our organization. Our Corporate EMS includes the following: <ul style="list-style-type: none"> • Identifying environmental aspects and impacts of our operations and products; • Analyzing these aspects and impacts against legal requirements and stakeholder expectations; • Developing initiatives to reduce operational impacts on the environment while complying with legal requirements; • Monitoring and measuring progress towards achieving relevant initiatives; • Educating and training employees to ensure an appropriate level of environmental awareness and competence; and • Reviewing the progress of our EMS to enable continuous improvement.
Employee engagement	We developed the Building a Better World Sustainability program to integrate sustainability into our company culture. It is critical that our associates are informed of what sustainability means to our business, our stakeholders, their day-to-day work, and how it and climate change impact our risks, opportunities and strategy. The Building a Better World program's success depends on and involves commitment from leaders and associates throughout all the departments and functions within our organization.

C4.5

(C4.5) Do you classify any of your existing goods and/or services as low-carbon products?

Yes

C4.5a

(C4.5a) Provide details of your products and/or services that you classify as low-carbon products.

Level of aggregation

Group of products or services

Taxonomy used to classify product(s) or service(s) as low-carbon

Other, please specify

Chemicals and plastics

Other, please specify

Feedstocks

Description of product(s) or service(s)

RPM brands offer durable, eco-friendly building solutions designed to make structures last longer with less maintenance and fewer energy demands. Many of RPM's products, services and processes drive sustainability by helping our customers minimize their environmental footprint. Energy efficiency, renewable resource use, life cycle analysis, LEED support, and emissions reductions are just some of the many customer expectations that RPM meets every day. Building a better future means continually investing in safer, greener products and processes that benefit our customers, end users and the environment. Some of the investments we have made to provide low-emissions products include:

- Sustainable building solutions that encourage building restoration and repair over replacement;
- Energy-conscious manufacturing processes that conserve energy and shrink the carbon footprint of our products; and
- Products designed to improve the energy efficiency of structures.

Have you estimated the avoided emissions of this low-carbon product(s) or service(s)

No

Methodology used to calculate avoided emissions

Life cycle stage(s) covered for the low-carbon product(s) or services(s)

Functional unit used

Reference product/service or baseline scenario used

Life cycle stage(s) covered for the reference product/service or baseline scenario

Estimated avoided emissions (metric tons CO₂e per functional unit) compared to reference product/service or baseline scenario

Explain your calculation of avoided emissions, including any assumptions

Revenue generated from low-carbon product(s) or service(s) as % of total revenue in the reporting year

0

C5. Emissions methodology

C5.1

(C5.1) Is this your first year of reporting emissions data to CDP?

No

C5.1a

(C5.1a) Has your organization undergone any structural changes in the reporting year, or are any previous structural changes being accounted for in this disclosure of emissions data?

Row 1

Has there been a structural change?

Yes, an acquisition

Name of organization(s) acquired, divested from, or merged with

RPM completed several significant acquisitions in 2021. The following organizations were acquired in 2021: Tuff Coat, Bison Innovative Products, PreBuck LLC, Pure Air Control Services, Inc, and Dudick Inc.

Additionally, RPM's Tremco Construction Products Group, acquired a chemical manufacturing facility located in Corsicana, Texas and purchased from ChampionX Corporation.

Details of structural change(s), including completion dates

In March of 2021, RPM completed two acquisitions, Tuff Coat, a leading rubberized, non-skid coating for aquatic applications, was acquired for RPM's Modern Recreational Technologies group. In addition, RPM's Fibergrate business acquired Bison Innovative Products, a leading manufacturer of raised flooring systems for outdoor living and rooftop environments. By enhancing Bison's distribution base, this acquisition enables Fibergrate to penetrate new geographies and markets.

RPM's Tremco Incorporated acquired PreBuck LLC, a manufacturer of engineered "buck" framing systems for insulated concrete form construction, in May 2021 as well as

Pure Air Control Services, Inc, a provider of indoor air quality control solutions, in August 2021.

In June of 2021, RPM’s Carboline subsidiary acquired the Dudick Inc. business. The addition of Dudick, a provider of high-performance coatings, flooring systems and tank linings, strengthens Carboline’s position in the secondary containment lining and flooring market.

RPM procured a 178,000-square-foot chemical manufacturing facility located on 120 acres in Corsicana, Texas. It will be owned and operated by RPM’s Tremco Construction Products Group and allows the group to expand the production of several high-growth product lines. In addition to acquiring the land, facility and equipment at the Corsicana plant, Tremco Construction Products Group also intends to hire the plant’s more than 80 existing employees.

C5.1b

(C5.1b) Has your emissions accounting methodology, boundary, and/or reporting year definition changed in the reporting year?

	Change(s) in methodology, boundary, and/or reporting year definition?	Details of methodology, boundary, and/or reporting year definition change(s)
Row 1	Yes, a change in methodology Yes, a change in boundary	In 2021, we expanded our boundary to include warehouses, offices, and other facilities operated by RPM. This includes facilities located in Costa Rica, Czech Republic, Dominican Republic, Estonia, Finland, Guatemala, Hong Kong, Hungary, Indonesia, Ireland, Japan, Kuwait, Malaysia, Namibia, Norway, Oman, Panama, Peru, Poland, Puerto Rico, Qatar, Russia, Singapore, Slovakia, and Thailand. Also, RPM is including facilities from the United Kingdom, Canada, United States, Argentina, Colombia, Belgium, and Germany. As we have continued to evaluate our data collection and accounting approaches, we identified our leased assets and accounted for associated emissions under Scope 2.

C5.1c

(C5.1c) Have your organization’s base year emissions been recalculated as result of the changes or errors reported in C5.1a and C5.1b?

Base year recalculation	Base year emissions recalculation policy, including significance threshold
-------------------------	--

Row 1	No, because we have not evaluated whether the changes should trigger a base year recalculation	We plan to evaluate whether the changes made in 2021 should trigger a base year recalculation.
-------	--	--

C5.2

(C5.2) Provide your base year and base year emissions.

The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition)

The Greenhouse Gas Protocol: Scope 2 Guidance

C6. Emissions data

C6.1

(C6.1) What were your organization's gross global Scope 1 emissions in metric tons CO₂e?

Reporting year

Gross global Scope 1 emissions (metric tons CO₂e)

43,406

Comment

C6.2

(C6.2) Describe your organization's approach to reporting Scope 2 emissions.

Row 1

Scope 2, location-based

We are reporting a Scope 2, location-based figure

Scope 2, market-based

We are reporting a Scope 2, market-based figure

Comment

C6.3

(C6.3) What were your organization's gross global Scope 2 emissions in metric tons CO₂e?

Reporting year

Scope 2, location-based

144,461

Scope 2, market-based (if applicable)

153,018

Comment

C6.4

(C6.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure?

Yes

C6.4a

(C6.4a) Provide details of the sources of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure.

Source

Mobile combustion

Relevance of Scope 1 emissions from this source

Emissions are relevant but not yet calculated

Relevance of location-based Scope 2 emissions from this source

No emissions excluded

Relevance of market-based Scope 2 emissions from this source (if applicable)

No emissions excluded

Explain why this source is excluded

We are working on calculating and capturing all mobile combustion emissions at our facilities.

Estimated percentage of total Scope 1+2 emissions this excluded source represents

0

Explain how you estimated the percentage of emissions this excluded source represents

We are unable to estimate the percentage of emissions this excluded source represents at this time and plan to estimate this metric in future reporting years.

Source

Biomass

Relevance of Scope 1 emissions from this source

Emissions are not relevant

Relevance of location-based Scope 2 emissions from this source

Emissions are not relevant

Relevance of market-based Scope 2 emissions from this source (if applicable)

Emissions are not relevant

Explain why this source is excluded

We are working on calculating and capturing all of our biomass emissions at our Viapol facility.

Estimated percentage of total Scope 1+2 emissions this excluded source represents

0

Explain how you estimated the percentage of emissions this excluded source represents

We are unable to estimate the percentage of emissions this excluded source represents at this time and plan to estimate this metric in future reporting years.

C6.5

(C6.5) Account for your organization's gross global Scope 3 emissions, disclosing and explaining any exclusions.

Purchased goods and services

C6.7

(C6.7) Are carbon dioxide emissions from biogenic carbon relevant to your organization?

Yes

C6.7a

(C6.7a) Provide the emissions from biogenic carbon relevant to your organization in metric tons CO2.

	CO2 emissions from biogenic carbon (metric tons CO2)	Comment
Row 1	0	We are looking for ways to improve our data collection process.

C6.10

(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure

0.000029

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)

187,868

Metric denominator

unit total revenue

Metric denominator: Unit total

6,100,000,000

Scope 2 figure used

Location-based

% change from previous year

19

Direction of change

Increased

Reason for change

In 2021, RPM's total Scope 1 and 2 GHG emissions included offices, warehouses and other facilities that were not previously included in our analysis. Therefore, our intensity metric increased as a result of this boundary update.

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization break down its Scope 1 emissions by greenhouse gas type?

Yes

C7.1a

(C7.1a) Break down your total gross global Scope 1 emissions by greenhouse gas type and provide the source of each used greenhouse warming potential (GWP).

Greenhouse gas	Scope 1 emissions (metric tons of CO ₂ e)	GWP Reference
CO ₂	43,361	IPCC Fourth Assessment Report (AR4 - 100 year)
N ₂ O	21	IPCC Fourth Assessment Report (AR4 - 100 year)
CH ₄	25	IPCC Fourth Assessment Report (AR4 - 100 year)

C7.2

(C7.2) Break down your total gross global Scope 1 emissions by country/region.

Country/Region	Scope 1 emissions (metric tons CO ₂ e)
Argentina	347
Australia	27
Belgium	1,033
Brazil	4,110
Canada	4,706
Chile	0
China	83
Colombia	147

C7.6

(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.

By business division

C7.6a

(C7.6a) Break down your total gross global Scope 2 emissions by business division.

Business division	Scope 2, location-based (metric tons CO ₂ e)	Scope 2, market-based (metric tons CO ₂ e)
Construction Products	54,073	57,714
Performance Chemicals	30,605	33,324
Specialty Products	17,400	17,790
Consumer Products	41,542	43,348
RPM	841	841

C-CE7.7/C-CH7.7/C-CO7.7/C-MM7.7/C-OG7.7/C-ST7.7/C-TO7.7/C-TS7.7

(C-CE7.7/C-CH7.7/C-CO7.7/C-MM7.7/C-OG7.7/C-ST7.7/C-TO7.7/C-TS7.7) Break down your organization’s total gross global Scope 2 emissions by sector production activity in metric tons CO₂e.

	Scope 2, location-based, metric tons CO ₂ e	Scope 2, market-based (if applicable), metric tons CO ₂ e	Comment
Chemicals production activities	76,688	81,550	Emissions for chemicals production are representative of manufacturing from our Construction Products, Performance Coatings, Specialty Products, and Consumer Product groups.

C-CH7.8

(C-CH7.8) Disclose the percentage of your organization’s Scope 3, Category 1 emissions by purchased chemical feedstock.

Purchased feedstock	Percentage of Scope 3, Category 1 tCO ₂ e from purchased feedstock	Explain calculation methodology
Specialty chemicals	0	We have not calculated our Scope 3, category 1 emissions at this time, so therefore our percentage of Scope 3, category 1 emissions from purchased feedstock is zero.

C-CH7.8a

(C-CH7.8a) Disclose sales of products that are greenhouse gases.

	Sales, metric tons	Comment
Carbon dioxide (CO ₂)	0	
Methane (CH ₄)	0	
Nitrous oxide (N ₂ O)	0	
Hydrofluorocarbons (HFC)	0	
Perfluorocarbons (PFC)	0	
Sulphur hexafluoride (SF ₆)	0	
Nitrogen trifluoride (NF ₃)	0	

C7.9

(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?

Increased

C7.9a

(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined), and for each of them specify how your emissions compare to the previous year.

	Change in emissions (metric tons CO2e)	Direction of change	Emissions value (percentage)	Please explain calculation
Change in renewable energy consumption	0	No change	0	RPM does not have any renewable energy consumption.
Other emissions reduction activities	0	No change	0	No emission reduction activities changes our gross global emissions in 2021.
Divestment	0	No change	0	RPM did not have any divestments in 2021.
Acquisitions	2,246	Increased	2	In the United States, the acquisition of several business competitors resulted in a 2% increase of the emissions. This is mainly the result of additional building being included as new sources of GHG emissions.
Mergers	0	No change	0	RPM did not have any mergers in 2021.
Change in output	7,908	Increased	6	If no measures had been introduced, increased demand leading to increased output would have generated 6% more of emissions.
Change in methodology	0	No change	0	Methodology changes did not impact our gross emissions.
Change in boundary	47,179	Increased	35	Emissions increase by 35% due to the inclusion of additional inventory items for our facilities across the world. As

				an example, we had several facilities in Asia and Latin America that we estimated emissions due to additional information becoming available.
Change in physical operating conditions	0	No change	0	RPM did not have any changes in physical operating conditions in 2021.
Unidentified	0	No change	0	RPM did not have any unidentified emission changes in 2021.
Other	0	No change	0	RPM did not have any other changes in emissions.

C7.9b

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?

Location-based

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

More than 5% but less than or equal to 10%

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertook this energy-related activity in the reporting year
Consumption of fuel (excluding feedstocks)	Yes
Consumption of purchased or acquired electricity	Yes
Consumption of purchased or acquired heat	No
Consumption of purchased or acquired steam	No

Consumption of purchased or acquired cooling	No
Generation of electricity, heat, steam, or cooling	No

C8.2a

(C8.2a) Report your organization’s energy consumption totals (excluding feedstocks) in MWh.

	Heating value	MWh from renewable sources	MWh from non-renewable sources	Total (renewable and non-renewable) MWh
Consumption of fuel (excluding feedstock)	HHV (higher heating value)	0	429,974	429,974
Consumption of purchased or acquired electricity		0	315,719	315,719
Total energy consumption		0	745,693	745,693

C-CH8.2a

(C-CH8.2a) Report your organization’s energy consumption totals (excluding feedstocks) for chemical production activities in MWh.

Consumption of fuel (excluding feedstocks)

Heating value

HHV (higher heating value)

MWh consumed from renewable sources inside chemical sector boundary

0

MWh consumed from non-renewable sources inside chemical sector boundary (excluding recovered waste heat/gases)

427,876

MWh consumed from waste heat/gases recovered from processes using fuel feedstocks inside chemical sector boundary

0

Total MWh (renewable + non-renewable + MWh from recovered waste heat/gases) consumed inside chemical sector boundary

427,876

Consumption of purchased or acquired electricity

MWh consumed from renewable sources inside chemical sector boundary
0

MWh consumed from non-renewable sources inside chemical sector boundary (excluding recovered waste heat/gases)
314,230

MWh consumed from waste heat/gases recovered from processes using fuel feedstocks inside chemical sector boundary
0

Total MWh (renewable + non-renewable + MWh from recovered waste heat/gases) consumed inside chemical sector boundary
314,230

Total energy consumption

MWh consumed from renewable sources inside chemical sector boundary
0

MWh consumed from non-renewable sources inside chemical sector boundary (excluding recovered waste heat/gases)
742,106

MWh consumed from waste heat/gases recovered from processes using fuel feedstocks inside chemical sector boundary
0

Total MWh (renewable + non-renewable + MWh from recovered waste heat/gases) consumed inside chemical sector boundary
742,106

C8.2b

(C8.2b) Select the applications of your organization’s consumption of fuel.

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	No
Consumption of fuel for the generation of heat	No
Consumption of fuel for the generation of steam	No

Consumption of fuel for the generation of cooling	No
Consumption of fuel for co-generation or tri-generation	No

C8.2c

(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.

C-CH8.3

(C-CH8.3) Does your organization consume fuels as feedstocks for chemical production activities?

No

C9. Additional metrics

C9.1

(C9.1) Provide any additional climate-related metrics relevant to your business.

C-CH9.3a

(C-CH9.3a) Provide details on your organization’s chemical products.

C-CE9.6/C-CG9.6/C-CH9.6/C-CN9.6/C-CO9.6/C-EU9.6/C-MM9.6/C-OG9.6/C-RE9.6/C-ST9.6/C-TO9.6/C-TS9.6

(C-CE9.6/C-CG9.6/C-CH9.6/C-CN9.6/C-CO9.6/C-EU9.6/C-MM9.6/C-OG9.6/C-RE9.6/C-ST9.6/C-TO9.6/C-TS9.6) Does your organization invest in research and development (R&D) of low-carbon products or services related to your sector activities?

	Investment in low-carbon R&D	Comment
Row 1	Yes	<p>Sustainability has always been a vital part of our product innovation process at RPM. For decades, our operating companies have led their industries with novel solutions that renew, repair and protect materials using sealants and coatings. We build on this progress by continually investing in safer, greener products and processes that benefit our customers, end users and the environment. Some of those investments include:</p> <ul style="list-style-type: none"> • Recyclable packaging and materials that minimize waste and give new life to leftover products; • Sustainable building solutions that encourage building restoration and repair over replacement; • Energy-conscious manufacturing processes that conserve energy and shrink the carbon footprint of our products; • Greener chemistries that reduce or eliminate potentially hazardous chemicals and materials of concern; and • Products designed to improve the energy efficiency of structures.

C-CH9.6a

(C-CH9.6a) Provide details of your organization’s investments in low-carbon R&D for chemical production activities over the last three years.

Technology area	Stage of development in the reporting year	Average % of total R&D investment over the last 3 years	R&D investment figure in the reporting year (optional)	Comment
Unable to disaggregate by technology area		≤20%		

C10. Verification

C10.1

(C10.1) Indicate the verification/assurance status that applies to your reported emissions.

	Verification/assurance status
Scope 1	No third-party verification or assurance
Scope 2 (location-based or market-based)	No third-party verification or assurance
Scope 3	No third-party verification or assurance

C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?

No, we do not verify any other climate-related information reported in our CDP disclosure

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?

No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?

No

C11.3

(C11.3) Does your organization use an internal price on carbon?

No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?

Yes, our customers/clients

C12.1b

(C12.1b) Give details of your climate-related engagement strategy with your customers.

Type of engagement & Details of engagement

Education/information sharing

Run an engagement campaign to education customers about your climate change performance and strategy

% of customers by number

100

% of customer - related Scope 3 emissions as reported in C6.5

100

Please explain the rationale for selecting this group of customers and scope of engagement

We published our Environmental, Social, and Governance Report in August 2020, will created an Sustainability webpage in October 2021 and will publish an updated Sustainability Report in 2022 that demonstrates our commitment to pursuing sustainable best practice and share our progress with all of our customers and other stakeholders. To earn the trust of our customers and stakeholders, we must be vigilant in responding to their in-creasing desire for safe, sustainable, and environmentally friendly products and take steps to reduce our own environmental footprint. RPM achieves this in part by developing products and business processes intended to increase energy efficiency, extend renewable resources, and control greenhouse gas emissions. Customers can read about our progress in these areas in our Sustainability report, which is publicly available on our website.

Impact of engagement, including measures of success

Our measure of success of our engagement is the number of Sustainability Report views. Our Sustainability Report received over 21,000 views during 2021. We update our sustainability website to communicate and engage with stakeholders about our ongoing sustainability efforts.

C12.2

(C12.2) Do your suppliers have to meet climate-related requirements as part of your organization's purchasing process?

No, and we do not plan to introduce climate-related requirements within the next two years

C12.3

(C12.3) Does your organization engage in activities that could either directly or indirectly influence policy, law, or regulation that may impact the climate?

Row 1

Direct or indirect engagement that could influence policy, law, or regulation that may impact the climate

Yes, we engage indirectly through trade associations

Does your organization have a public commitment or position statement to conduct your engagement activities in line with the goals of the Paris Agreement?

No, and we do not plan to have one in the next two years

Describe the process(es) your organization has in place to ensure that your engagement activities are consistent with your overall climate change strategy

RPM does not have any process in place to ensure engagement activities are consistent with overall climate change strategy. We are currently evaluating how we plan to address this potential for conflict in the future as we begin strategize ways to mitigate our climate-related risks and opportunities

C12.3b

(C12.3b) Provide details of the trade associations your organization engages with which are likely to take a position on any policy, law or regulation that may impact the climate.

Trade association

Other, please specify

American Coatings Association (ACA)

Is your organization's position on climate change consistent with theirs?

Consistent

Has your organization influenced, or is your organization attempting to influence their position?

We have already influenced them to change their position

State the trade association’s position on climate change, explain where your organization’s position differs, and how you are attempting to influence their position (if applicable)

The ACA states on its website that “the coatings industry actively addresses environmental improvements by managing and minimizing toxins and wastes, reducing air emissions, and promoting product and environmental stewardship. To manufacture products in an environmentally conscious way without compromising product performance, industry has shifted to innovative technologies, including water-based, powder, and ultraviolet cure coatings, as well as other processes to achieve minimal emissions.” According to the ACA’s 2021 Sustainability report: “The ACA and its members have taken additional steps to ensure their commitment to sustainability is constantly evolving as new frameworks, advances in science, and climate change policy is focused. Impacts of climate change have dominated conversations in the sustainability arena. The coatings industry has been instrumental in creating products that will assist in lowering the negative effects associated with climate change and is working to minimize its impact from manufacturing and transportation. Paints and coatings present ample sustainable benefits because they provide durability to a variety of products, increasing their lifespan and reducing waste.”

Since 2012, RPM’s Chairman and CEO has been a key member of the American Coatings Association’s Board of Directors. Members of the Board help to shape the direction and decisions that often determine industry positions before regulators and policymakers. By being apart of the ACA, RPM is a key player in addressing environmental improvements, minimizing toxins and waste, reducing air emissions, and promoting product and environmental stewardship in the coatings industry. In particular, RPM is a leading member of the ACA’s PaintCare program by promoting and participating in the recycling of unused or leftover paint. The program has partnerships with more than 200 local waste collection facilities across the country. As a result, more than 50 million gallons of post-consumer architectural paint has been collected to date. This is just one of the many ways we directly involve our customers in our sustainability journey.

Funding figure your organization provided to this trade association in the reporting year, if applicable (currency as selected in C0.4) (optional)

Describe the aim of your organization’s funding

Have you evaluated whether your organization’s engagement with this trade association is aligned with the goals of the Paris Agreement?

Yes, we have evaluated, and it is not aligned

C12.4

(C12.4) Have you published information about your organization’s response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

Comment

The Company will publish updated sustainability report in 2022.

C15. Biodiversity

C15.1

(C15.1) Is there board-level oversight and/or executive management-level responsibility for biodiversity-related issues within your organization?

	Board-level oversight and/or executive management-level responsibility for biodiversity-related issues
Row 1	No, and we do not plan to have both within the next two years

C15.2

(C15.2) Has your organization made a public commitment and/or endorsed any initiatives related to biodiversity?

	Indicate whether your organization made a public commitment or endorsed any initiatives related to biodiversity
Row 1	No, and we do not plan to do so within the next 2 years

C15.3

(C15.3) Does your organization assess the impact of its value chain on biodiversity?

	Does your organization assess the impact of its value chain on biodiversity?
Row 1	No, and we do not plan to assess biodiversity-related impacts within the next two years

C15.4

(C15.4) What actions has your organization taken in the reporting year to progress your biodiversity-related commitments?

	Have you taken any actions in the reporting period to progress your biodiversity-related commitments?
Row 1	No, and we do not plan to undertake any biodiversity-related actions

C15.5

(C15.5) Does your organization use biodiversity indicators to monitor performance across its activities?

	Does your organization use indicators to monitor biodiversity performance?	Indicators used to monitor biodiversity performance
Row 1	No	

C15.6

(C15.6) Have you published information about your organization's response to biodiversity-related issues for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

Report type	Content elements	Attach the document and indicate where in the document the relevant biodiversity information is located
No publications		

C16. Signoff

C-FI

(C-FI) Use this field to provide any additional information or context that you feel is relevant to your organization's response. Please note that this field is optional and is not scored.

C16.1

(C16.1) Provide details for the person that has signed off (approved) your CDP climate change response.

	Job title	Corresponding job category
Row 1	Vice President – Compliance and Sustainability and Associate General Counsel	Chief Sustainability Officer (CSO)

SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

SC0.1

(SC0.1) What is your company's annual revenue for the stated reporting period?

	Annual Revenue
Row 1	6,100,000,000

SC1.1

(SC1.1) Allocate your emissions to your customers listed below according to the goods or services you have sold them in this reporting period.

SC1.2

(SC1.2) Where published information has been used in completing SC1.1, please provide a reference(s).

SC1.3

(SC1.3) What are the challenges in allocating emissions to different customers, and what would help you to overcome these challenges?

Allocation challenges	Please explain what would help you overcome these challenges
<p>Diversity of product lines makes accurately accounting for each product/product line cost ineffective</p>	<p>We are not able to provide the applicable emissions data at this time, however we are working to advance our sustainability programs. Through our MAP to Growth strategy and the centralization of certain manufacturing, procurement, and general administrative functions, we are taking a more holistic view of our ESG practices. This is why we conducted a robust ESG materiality assessment of our operations in fiscal 2020. This assessment identified our most significant ESG issues for our business. In addition, the materiality assessment provided RPM with quantified, meaningful ESG information highlighting our key ESG impacts and potential areas for improvement. We are in the process of developing a new sustainability strategy based upon the outcomes of our materiality assessment, which will strengthen our governance and management of all material ESG topics. As a part of this new strategic approach, we are developing methods to measure and track our emissions at a group level.</p>
<p>Customer base is too large and diverse to accurately track emissions to the customer level</p>	<p>We are not able to provide the applicable emissions data at this time, however we are working to advance our sustainability programs. Through our MAP to Growth strategy and the centralization of certain manufacturing, procurement, and general administrative functions, we are taking a more holistic view of our ESG practices. This is why we conducted a robust ESG materiality assessment of our operations in fiscal 2020. This assessment identified our most significant ESG issues for our business. In addition, the materiality assessment provided RPM with quantified, meaningful ESG information highlighting our key ESG impacts and potential areas for improvement. We are in the process of developing a new sustainability strategy based upon the outcomes of our materiality assessment, which will strengthen our governance and management of all material ESG topics. As a part of this new strategic approach, we are developing methods to measure and track our emissions at a group level.</p>

SC1.4

(SC1.4) Do you plan to develop your capabilities to allocate emissions to your customers in the future?

No

SC1.4b

(SC1.4b) Explain why you do not plan to develop capabilities to allocate emissions to your customers.

Historically, RPM's subsidiaries employed an entrepreneurial operating philosophy, with each responsible for managing environmental, social, and governance (ESG) in an autonomous manner that best benefits each business. Through our MAP to Growth strategy and centralization of certain manufacturing, procurement, and general administrative functions, we are taking a more holistic view of our (ESG) practices. We are motivated to do so in part because of RPM's long history of corporate social responsibility, and because of increased interest in and desire for greater ESG disclosure from RPM's key stakeholders, including investors and customers such as Walmart.

To inform this strategy, in fiscal 2020, RPM conducted a robust ESG materiality assessment of our operations. This assessment identified relevant ESG issues for our business. In addition, the materiality assessment provided RPM with quantified, meaningful ESG information highlighting our key ESG impacts and potential areas for improvement. We are in the process of developing a new sustainability strategy based upon the outcomes of our materiality assessment, which will strengthen our governance and management of all material ESG topics. As a part of this new strategic approach, we are developing methods to measure and track our emissions at a group level.

SC2.1

(SC2.1) Please propose any mutually beneficial climate-related projects you could collaborate on with specific CDP Supply Chain members.

SC2.2

(SC2.2) Have requests or initiatives by CDP Supply Chain members prompted your organization to take organizational-level emissions reduction initiatives?

No

SC4.1

(SC4.1) Are you providing product level data for your organization's goods or services?

No, I am not providing data

Submit your response
